Strider 19 delivered to 77 metre superyacht

Thursday, 8 January 2015

By Maarten Janssen

Italian yard Sacs has recently launched the Strider 19, designed by Christian Grande, who styled the tender, and Naiad studio in New Zealand, who designed the hull. The Strider 19 will be used as a tender to a 77 metre superyacht.

The Strider 19 features a deep-V hull, low center of gravity, and her large tubes allow for fast cruising in all sea conditions. She is powered by twin 1,150 hp Caterpillar engines, which enable the yacht to reach a top speed of 50 knots, and a cruising speed of about 45 knots.

The vessel is designed to carry up to 22 people, and features plenty of outside deck space, as well as two large cabins, one double and one triple, a bathroom and small lounge area inside.
